25TH

ANNIVERSARY

THE ART OF

FINE HULL MAKING

Centuries ago, when Aleuts and Inuits designed their kayaks, they did not have modern technologies available. They had to do it for the reason to survive. The kayak hulls designed by them were perfect – they returned home alive and with food. 25 years ago, when two competition paddlers started Tahe Outdoors, they did not have any experience in kayak hull designing, but they did have willpower and friends.

First faxed drawing of kayak hull design and knowhow they got from friends from Finnish Canoe Federation, they produced their first kayaks, which they named Mari and they were masterpieces. That is how the story started.

When we talk about kayak hull making then we take into account two factors, which are hull designing and hull manufacturing. Engineering education does not give the designer automatically skills for hull designing. Passion, experience and talent are keywords when we describe a great hull designer. We proudly can say all these words, when we describe our

colleagues, who design hulls for our kayaks. Every millimeter has to be carefully calculated and tested. As important as every millimeter in hull design is also every millimeter in hull manufacturing. We are dedicated to details both in terms of construction and performance. This is why we spend so much time on the development process. Our passion reflects in every single millimeter of the hull, which gives a feeling of perfect craftsmanship to our customers. We always care about feedback of our testers. We always care about our customers, as reputation and trust are the most important keywords in water-sport industry. Our mission is to change your lifestyle and we do our utmost to reach this goal!

INNOVATION THAT EMPOWERS YOU

Zegul product range is targeted for more advanced and dedicated paddlers. Zegul also features different styles of kayaks like fast racing boats, play boats and of course the famous Greenland series. Quality is reflected in every single detail. Carefully designed and tested hulls offer excellent performance. Sleek lines and crocodile pattern on kayak decks give a really distinctive look to all Zegul models. These high-end kayaks are built with only the most innovative and high-tech materials. Zegul kayaks built with 3D C-CORE method are finished with a clear carbon hull, which takes years of experience to be done correctly.

In 2012 Zegul launched a new 3 dimensional carbon fabric with this construction method, resulting in even tougher and stiffer kayaks. 3D C-CORE kayaks are built using full HD LRA core lay-up in the kayak hulls.

EGALIS

CONSTRUCTION: ZEGUL A-CORE

This very versatile construction is built using vacuum technology, which ensures the best weight/strength ratio.

This material lay-up increases durability and stiffness of the kayak, absorbing even less energy during paddling and withstanding the most challenging environments.

All ZEGUL A-CORE built kayaks are equipped with sandwich reinforced keel area - ensuring scratch and impact strength. Hull and deck are joined using internally both fiberglass and aramide taping, externally a very robust aramide taping. All decks are built in sandwich construction. (Available for all Zegul kayak models)

BELUGA

EGALIS

CONSTRUCTION: ZEGUL 3D C-CORE

Kayaks built with this method are finished with a clear carbon hull, which takes years of experience to be done correctly. From 2012 season we have launched a new 3-dimensional carbon fabric into this construction, giving even tougher and stiffer kayaks.

The ZEGUL 3D C-CORE kayaks are built using full HD LRA core lay-up in the kayak hulls.

This production method combines vacuum infusion technology with high performance properties of special marine grade epoxy resin and several types of carbon fiber, carbon/aramide and glass multiaxial fabrics to create probably the highest quality carbon core built kayaks in the industry. These kayaks are even more versatile than the regular carbon/aramide and carbon built kayaks on the market.

ZEGUL ROCK SOLID

We at Zegul took the well known, Arrow kayaks developed Rock Solid construction and improved it even further. It certainly wasn't an easy task. Mr. Ilcus from Arrow kayaks was a part of the R&D team and carefully inspected all the layers at our facilities. After discussion and testing we decided

to add another layer of glass/kevlar, making the laminate even stronger and stiffer. The positioning of the pure kevlar keel strip was modified to give even better results. We also made improvements on the outer finish of the keel strip for a smoother and more even result. After thorough tests we are convinced that it is a success!

SPECIALTY

ZEGUL BAIDARKA

In the 1700's, Russian sailors sailing the Aleutian Islands gave this uniquely-shaped kayak the name „Baidarka“ meaning „small boat“.

The lower portion of its upswept bow is extremely narrow, allowing for clean entry lines, while the upper bow is fuller and wider, increasing buoyancy, causing the Baidarka to rise over the oncoming waves. Baidarkas are known for their unusually fast speed. With their Swede form shape and high volume stern they produce an incredibly high hull speed. Our Baidarka is designed for the paddler who desires a unique looking boat with performance, light weight and beauty.

ZEGUL BAIDARKA GT

In the 1700's, Russian sailors sailing the Aleutian Islands gave this uniquely-shaped kayak the name „Baidarka“ meaning „small boat“.

The lower portion of its upswept bow is extremely narrow, allowing for clean entry lines, while the upper bow is fuller and wider, increasing buoyancy, causing the Baidarka to rise over the oncoming waves. Baidarkas are known for their unusually fast speed. With their Swede form shape and high volume stern they produce an incredibly high hull speed.

The Baidarka GT introduced for 2012 season is designed keeping touring in mind for day/ weekend trips or even a smaller expedition. The specially designed narrow hull provides you with incredible speed, what was one of the original ideas of these extremely different kayak designs – getting fast from A to B whilst enjoying the ride! The best performance of this kayak will appear while paddling downwind and in calm waters.

ZEGUL VELOCITY

The Zegul Velocity is a new boat introduced for 2012.

The boat is designed to be sporty and fast with increased stability when compared with other boats in its class, it also has good sea manners, a generous carrying capacity and the ability to really go fast in a following sea, this is what defines this boat against conventional fast tourers. In other words the Zegul Velocity is focused on paddlers that want to cover miles in rough water with the option to carry gear for a long haul, do a workout paddle with the boat empty and yet still manage surf and manoeuvre effectively.

PLAY BOATING

ZEGUL SEASKATER

This boat has been designed to give you the best combination of speed and maneuverability.

Surf playing capability is the Seaskater's party piece, yet it is stable even in the roughest waters. Beginner paddlers can feel safe and comfortable in the surf with this boat. At the same time it can challenge even the best paddlers and provide them with all the thrills of play boating. High number of storage compartments mean you can take all the gear you might need.

ZEGUL GREENLAND

You have to try out this kayak if you are into Greenland style of paddling.

Maybe one of the most well recognized kayaks on the market today. With the classic lines and low volume it has given many paddlers the joy and the interest of trying something new, or go "back to basics" traditional design. Zegul Greenland style kayaks have particularly low volume and a tight fit to Your body, which gives You a full control of what You are doing and provides You with the feeling of being closer to water than ever. Greenland style kayaks are designed with classic lines, with the hard chine all the way along the V-bottomed hull. The kayak decks are designed with low back deck for easy laid back rolls, and rather low volume of the front deck to help you on the forward rolls. The rocker in the hull design is to ease maneuvers. The Zegul Greenland is designed for paddlers who want to make the Greenland rolls look easy.

PLAY BOATING

ZEGUL ARROW PLAY MV

Arrow Play MV is a performance sea kayak, developed specially for maneuvering and Playing in the sea.

It is also an excellent kayak for day trips and longer overnight getaways. The hull has significant rocker and volume in the bow to avoid diving when riding down the wave. The mid section has a slightly rounded profile making it very smooth from edge to edge. This combined with the hard chines make the Play a joy to paddle whether you enjoy the rough stuff or just want a sea kayak that responds instantly to your moves. We have spent hundreds of hours with development, research and testing the Play MV model. In the past four years the Play has proven to be very popular sea kayak over scandinavia.

In 2013 we have redesigned the deck and bow making the deck look smoother with softer lines, especially the front deck has a lower appearance and will catch less wind. The deck line outfitting has been made more practical and the overhang in the bow has been lowered and extended. The key selling point for the Play MV is versatility – it fits wide range of paddlers in almost all skill levels. It is stable without sacrificing maneuverability and speed. storage capacity, then gave it a keyhole cockpit for easier entrance and exit.

PLAY BOATING

ZEGUL ARROW PLAY LV

The LV is a smaller version of the Zegul Arrow Play MV, the hull is cut lower and it is slightly shorter.

The Play LV gives the smaller paddler a tighter fit resulting in more control and feel for the kayak. The hull has a high degree of rocker and a fairly high volume in the bow. The mid section has a slightly rounded hull profile making it very smooth form edge to edge. This combined with the hard chines makes the Play LV a joy to paddle whether you enjoy the rough stuff or just want a kayak that responds instantly to your moves. The edge is rock solid and the Play LV has a very nice glide through the water.

We have spent hundreds of hours with development, research and testing with the original Play MV model. The Zegul Arrow Play LV benefits from its larger siblings tests. Many of our dealers has long asked for a smaller Play, so here it is guys! The key selling point for the Zegul Play LV is versatility and fit – it fits the smaller or athletically built paddlers of almost all skill levels. It is stable without sacrificing maneuverability and speed.

TOURING/EXPEDITONS

ZEGUL ARROW EMPOWER

The Empower is a full bodied sea kayak made for long trips and expeditions.

The Empower kayak is surprisingly agile despite its length, has a very nice glide and it handles almost like a play boat when put on edge.

The Empower kayak has soft chines and a long water line. The hull's profile is rounded and the rocker is moderate to handle big seas. The four hatches are all beautifully recessed into the deck and packs with ease for extended trips or just for a weekend getaway. The knee hatch holds gear like an VHF radio or cell phone and small water bottle. The day hatch has lots of room for other stuff needed while at sea.

ENJOY
THE SPIRIT
OF
TAHE MARINE

Take Marine stands for 25 years experience in watersport industry. Through the Take Marine brand we offer the best value for money in kayaks. Take Marine has a wide selection of different kayaks for different tastes, skills and conditions. From attractively priced single and triple layer rotomolded recreational kayaks to state of the art vacuum infused carbon fibre touring kayaks. All Take Marine kayaks are developed with dedication and manufactured in Estonia. Take Marine also has different types of composite and triple layer polyethylene rotomolded kayaks available. The latest addition to this are single layer polyethylene kayaks.

TECHNOLOGY

Take Outdoors has concentrated over the years in developing manufacturing techniques together with the composite and thermoplast industry. We use the newest materials and up-to-date production methods. Take Marine branded kayaks are built with following hi-tech constructions:

TGC
lite

TGC-lite – introduced for 2012 season into Take Marine range. This new construction is developed together with racing kayak material suppliers. The key element in this lay-up is the new 98% recyclable HD core material, providing very tough but light weight laminates. This combined with light weight glass composite fabrics giving a 10-15% weight reduction compared to our regular TGC construction.

TCA
lite

TGC-lite – introduced for 2012 season into Take Marine range. This rarely new construction has been developed together with racing kayak material suppliers. The key element in this lay-up is the new LRC core material, providing very tough but light weight laminates. This combined with light weight glass composite fabrics giving a 10-15% weight reduction compared to our previous TGC construction. In this production method we are combining the high performance properties of the DCPD based resin with several types of fibreglass reinforcements.

TCI
lite

TCI-lite – do not confuse this with vacuum bagging! Vacuum infusing is one of the most advanced construction methods used in the composite industry. This production method ensures the best strength/weight ratio possible. Take Outdoors as a company launched this production method very successfully in the year of 2005. We have been building our Take Marine carbon range ever since. Here we are combining the high-performance properties of marine grade epoxy resin with several types of carbon fibre, carbon/aramide and glass fabrics to create very high-end products with smooth and clear carbon look.

TRM

TRM – in 2009 season, Take Outdoors launched their first triple layer high density polyethylene kayak with moulded in inserts in several colour options. We believed it to become a very successful method of extending our range of materials and products. By 2012 we had launched totally seven RM kayaks, four of it only for 2012 season. In 2012 season we upgraded our construction to a new superlinear HD polyethylene material both in skin and in sandwich. Helping us to build even tougher and lighter weight boats for the watersport industry. In 2013 we implemented mould in graphics to all of our RM kayaks. For 2014 we are happy to inform you that we introduce 7 new RM kayaks into the Take Marine product portfolio, including 5 in single layer superlinear HD polyethylene material giving our customers even a wider range of plastic kayaks from recreational SOT's to triple layer sea and touring kayaks.

ABS
hybrid

ABS-Hybrid – this method combines the good properties of the ABS material in the hull and fiberglass technology in the deck lay-up. In this production method the hulls are thermoformed giving the kayak a higher impact resistant surface, reinforced with the great experience of the composite industry. The decks are built out of fiberglass materials combined with sandwich construction. This production method is one of the innovations of the industry giving the paddler a very durable performance orientated product.

Take Outdoors is working closely together with the leading suppliers around the world in the industry to offer customers the best value-for-money kayaks available on the market. Every year we have created bolder-looking kayaks both in design and finish – we believe this year is no different. Our aim is not just to satisfy our customers, we want them to be enthusiastic about our products and services.

CHOOSING YOUR KAYAK

HULL SHAPES

Our wide selection of hull shapes is designed to satisfy your needs. There is always a choice for paddler who knows what to expect.

Round hull

Extremely fast for more dedicated users

Hard chine

Well defined edge gives the opportunity to keep the kayak tilted, stable and moderately fast

Shallow "V"

Very fast and improved tracking with a good stability

Shallow arch

Very stable and highly maneuverable

Flat hull

Very stable and suitable for beginners who paddle in calm waters

KAYAK DIMENSIONS

WIDTH

a wider boat is more stable, slower and more spacious

a narrower boat is faster bringing the paddlers strokes closer

LENGTH

a narrower boat is faster bringing the paddlers strokes closer

a longer boat goes faster and tracks straighter, glides farther and can carry heavier loads

KAYAK STYLES

Transitional/recreational kayaks are meant for customers that want better performance than solely recreational kayaks but still want their comfort and spaciousness. Kayaks in this category will pleasantly surprise with their speed and handling characteristics. These kayaks are suitable for lakes and rivers.

Our **Sea/Touring kayaks** are the all-purpose kayaks. They are our most balanced boats, intended for paddlers who want one boat that does everything.

Tandem kayaks - Tahe Marine makes a variety of tandem kayaks to meet any paddlers' needs.

Fit series / Lifestyle series

Wind series / Reval series / Spirit series

Tandem series

RUDDER & SKEG

A rudder gives the opportunity to steer with pedals and paddle at the same time to maintain speed so that it makes the kayak go straight with less effort.

A skeg enhances tracking but you still need to use paddle strokes for steering.

SEA/TOURING KAYAKS

WIND SOLO

The Wind Solo was the first composite kayak in the Wind range introduced for 2007 season.

Now as a renewed third generation model for 2012 we have listened to our customers and improved this very popular model even more! Our Wind series is designed for speed. They are the fastest sea touring kayaks in the Tahe Marine line. Winds are an excellent choice for marathons, exercise trips and longer expeditions. The shallow V hull ensures fast acceleration, speed, and a nice balance between maneuverability and tracking. The Wind Solo is a good all-around kayak, suitable for a range of experience and a variety of paddling conditions. It is equipped with three hatches and spacious storage compartments for all the equipment You may need. The Wind series comes with either a skeg or rudder/skeg combination.

SEA/TOURING KAYAKS

WIND 535

This kayak has been designed keeping bigger volume in mind.

The Wind 535 has been brought to the market for medium to large sized paddlers. The larger cockpit size with thighbraces secure easier entry and good grip during paddling. Due to the larger size in volume, the kayak is equipped with two oval hatches for easier storage in compartments and a mini-box for smaller equipment. Our Wind series is designed for speed. They are the fastest sea touring kayaks in the Tahe Marine line. Winds are an excellent choice for marathons, exercise trips and longer expeditions. The kayak is designed with shallow V-shape, which secures fast acceleration, speed and maneuverability. The Wind 535 has paddle entry straps on the deck, in order to easy re-enter. The Wind series comes with either a skeg or rudder/skeg combination.

SEA/TOURING KAYAKS

REVAL MINI

Despite its small dimensions, Reval Mini will provide stability, speed and wave-riding abilities comparable to our usual Reval kayak.

Low rear deck provides more stability in windy conditions and allows to make lay-back moves easily. Capacity of storage-rooms and placement of hatches allow using this kayak for longer tours. Although Reval Mini is targeted to a smaller to medium sized paddler in the weight range about 75 kg, it will also provide a nice day/play boat option with sprightly handling in rougher seas and some good surfing potential. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

LENGTH / WIDTH	483 cm (15'10") / 52 cm (20½")

SEA/TOURING KAYAKS

REVAL MINI LC

The Reval Mini LC was designed keeping in mind a higher volume version than the regular one.

Although it ended up with a lot of similarities to the Reval Mini, it is still a slightly different kayak. With two cm wider hull and more volume, this kayak is definitely suitable for a medium sized paddler, who wants to enjoy a roomier cockpit area, whilst paddling. The LC cockpit with thighbraces provides a much easier entry and good support. The hull is designed with rocker and upswept bow and stern. The initial stability of the Reval Mini LC is higher than on the regular version providing a secure feeling. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

REVAL MINI LC PE

The Reval Mini LC PE model was introduced for the 2012 season, due to the huge success of the composite version.

The Reval Mini LC was designed keeping in mind a higher volume version than the regular one. Although it ended up with a lot of similarities to the Reval Mini, it is still a slightly different kayak. With two cm wider hull and more volume, this kayak is definitely suitable for a medium sized paddler, who wants to enjoy a roomier cockpit area, whilst paddling. The LC cockpit with thighbraces provides a much easier entry and good support. The hull is designed with rocker and upswept bow and stern. The initial stability of the Reval Mini LC is higher than on the regular version providing a secure feeling. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

LENGTH / WIDTH	490 cm (16'1") / 54 cm (21¼")
CAPACITY APPROX	120 kg (265 lbs)
COCKPIT	80 x 42 cm (31½" x 16½")
WEIGHT	PE: 25-27 kg (55-59 lbs)
STORAGE	front: round hatch 24 cm (10") day-hatch: 15 cm (6") rear: oval hatch 44 x 26 cm (17" x 10¼")
OPTIONAL FEATURES	compass, adjustable thigh braces, thigh pads

REVAL MIDI

The Reval Midi is an ideal choice for adrenaline seekers, as this kayak has a wonderful stability and navigability even in breaking waves and strong winds.

The hull is designed with rocker and upswept bow and stern to handle any challenging conditions of the sea. The kayak deck is equipped with 2 oval hatches and a day-hatch for easier entry into compartments. As also the name suggests the volume of the Reval Midi is to be sufficient for weekend-trips or shorter expeditions. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

SEA/TOURING KAYAKS

REVAL

Reval is a boat of choice for those wanting a true allround sea kayak design with the performance to handle any conditions.

The hull with rocker and upswept bow provide a dry and smooth ride over waves with precise and confidence inspiring handling and stability, all in an elegant package. The relatively low rear deck helps prevent weather cocking in windy conditions and allows easy rolling. The Reval is ideal for the medium to large sized paddler looking for a versatile easy to use boat that is agile enough as a day boat but with plenty of carrying capacity for multi day trips. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

LENGTH / WIDTH	555 cm (18'2") / 54 cm (21¼")
CAPACITY APPROX	155 kg (341 lbs)
COCKPIT	72 x 40 cm (28¼" x 15¾")

REVAL HV

The Reval HV is new model for the 2014 season, due to the huge success of the Reval Midi PE version.

The Reval HV, like the Reval Midi PE, is an ideal choice for adrenaline seekers, as this kayak has a wonderful stability and navigability even in breaking waves and strong winds. The hull is designed with rocker and upswept bow and stern to handle any challenging conditions of the sea. The kayak deck is equipped with a round, an oval and a day-hatch for easier entry into compartments. As the name - HV (high volume) - suggests the volume of the Reval HV is to be sufficient also for paddlers who are used to a roomier cockpit. This kayak is suitable for longer trips and expeditions. The Reval series is for paddlers who want a British style kayak. The Hulls are designed with more rocker and their upswept bows and sterns designed to handle more challenging sea conditions. The Reval series kayaks are equipped with retractable skeg or retractable skeg/rudder option.

LENGHT / WIDTH	535 cm (17'7") / 56 cm (22")

SEA/TOURING KAYAKS

OCEANSPIRIT PE

The Spirit series are our „go-to“ boats for the paddler who doesn't have an armada to choose from.

There is always a trade-off between handling, speed, and stability; our designers had balance in mind for these kayaks. The balance changes with the skill level of the paddler. Keeping this in mind, our designers came up with four progressively advanced kayaks. The OceanSpirit PE has the highest volume of the series. The deck is equipped with one round, one oval and a round day-hatch in order to easily pack your gear. The kayak has soft chines and a V-shape hull which makes it easier to handle in the waves. The OceanSpirit PE is a kayak that does a lot of things well, so much that if you only wanted one boat, for general touring, current play, rolling and even moderate open ocean travel, it would be an excellent choice for a range of paddler sizes, as well as skill levels from aggressive beginners to advanced paddlers. The Spirit series is the perfect choice for those, who appreciate a quality product that comes at an affordable price. The Spirit series kayaks come with either a skeg or rudder/skeg combination.

LENGTH / WIDTH	519 cm (17') / 58 cm (23")
CAPACITY APPROX	135 kg (298 lbs)
COCKPIT	88 x 44 cm (34½" x 17¼")
WEIGHT	PE: 26–28 kg (57–62 lbs)

SEA/TOURING KAYAKS

SEASPIRIT PE

The Spirit series are our „go-to“ boats for the paddler who doesn't have an armada to choose from.

There is always a trade-off between handling, speed, and stability; our designers had balance in mind for these kayaks. The balance changes with the skill level of the paddler. Keeping this in mind, our designers came up with four progressively advanced kayaks. The SeaSpirit PE model was introduced for 2012 season, as a successor of the very popular SeaSpirit composite model. Moving up from the OceanSpirit, we have designed a truly multifunctional kayak. It is the most evenly balanced boat in the series. The kayak hull is designed with a shallow V-bottom with hard chine and flared sides, which will secure a stable performance. This safe and stable boat is perfect for beginners, but can bring a lot of joy to an experienced paddler as well. SeaSpirit PE is designed for longer trips or even expeditions, as it has 2 oval hatches to ease the storage of Your gear. With the standard deck layout you will also have a place for an extra paddle, map, or other accessories You may need on the water. The Spirit series is the perfect choice for those, who appreciate a quality product that comes at an affordable price. The Spirit series kayaks come with either a skeg or rudder/skeg combination.

LENGTH / WIDTH	500 cm (16'4.9") / 56 cm (22")
CAPACITY APPROX	135 kg (298 lbs)
COCKPIT	87 cm x 47,5 cm (34¼" x 18½")
WEIGHT	PE: 25–27 kg (55–60 lbs)

BAYSPIRIT

The Spirit series are our „go-to“ boats for the paddler who doesn't have an armada to choose from.

There is always a trade-off between handling, speed, and stability; our designers had balance in mind for these kayaks. The balance changes with the skill level of the paddler. Keeping this in mind, our designers came up with four progressively advanced kayaks. The BaySpirit kayak is from the Spirit series the more advanced one. With a little less stability than the SeaSpirit, BaySpirit has been given some more speed with the slightly round shaped hull. Stability is still comfortable, but the feeling is more even. With the standard deck layout you will also have a place for an extra paddle, map, or other accessories You may need on the water. The deck comes also with minibox, to secure easier access to Your needs. The Spirit series is the perfect choice for those, who appreciate a quality product that comes at an affordable price. The Spirit series kayaks come with either a skeg or rudder/skeg combination.

LENGTH / WIDTH	525 cm (17'3") / 56 cm (22")

PLAYSPIRIT PE

The Spirit series are our „go-to“ boats for the paddler who doesn't have an armada to choose from.

There is always a trade-off between handling, speed, and stability; our designers had balance in mind for these kayaks. The balance changes with the skill level of the paddler. Keeping this in mind, our designers came up with four progressively advanced kayaks. Launched in 2014 the Playspirit PE is designed to keep things fun. With rocker hull-shape this is a playful kayak. This boat handles great in the waves and is also rather easy to roll. With a hard chine and a moderate v-shaped bottom with fine endings at the bow and stern, this kayak is made to maneuver. A set of three storage hatches can fit your gear easily in addition to numerous cords on the deck. You can have the Playspirit PE with a skeg or a skeg and rudder combination.

LENGTH / WIDTH	467 cm (15'4") / 59 cm (23¼")

LIFESTYLE SOLO

The customers who choose their kayak from the Lifestyle series will be the most pleasantly surprised.

With the oversized cockpits and increased stability, some may think these are just meant for beginners, but our design team has far exceeded expectations. Though these kayakers are extremely stable, they have exceptional handling and a surprising amount of speed. Lifestyle Solo together with PE version was the news for 2012 season. This kayak is suitable for smaller size paddlers. Lifestyle Solo is equipped with two round hatches for easier packing and access to Your equipment. In standard the kayak has no rudder installed and it has also been designed so that can be paddled easily without one. Therefore we think that this is the kayak what is good for a beginner paddler to start his paddling career. Ofcourse optionally the complete rudder set can be ordered to the kayak.

AQUA
TEAM PE

Aqua Team sit on top tandem kayak design allows easy entry to accommodate paddlers of any size.

This kayak has two **adult size** seats and one child seat in the middle. The extra space can also be used for storing gear.

The Team is a strong and robust kayak, which makes it unassailable to rough conditions like low depth rivers. This kayak also has extra reinforcement at the bow which adds to the durability. A total of 7 drainage plugs have also been implemented into the design. The Team suits for paddlers who are looking for a budget kayak with light weight and high stability. It can also be an ideal choice for fishing minded paddlers.

LENGHT / WIDTH	442 cm (14'6") / 86 cm (34")

TANDEM KAYAKS

TANDEM MINI

Tandem range consists of nice touring kayaks for people who need a stable and stylish kayak built for two paddlers.

The selection of models include Tandem Mini, a smaller tandem kayak that is known for its stability and maneuvering capabilities in tight coastal conditions. Tandem Mini, due to its shorter length, is an easy boat to carry and store. The new version for 2011 is even roomier than the previous well-known and appreciated model – it has two oval hatches and large compartments for either a lot of expedition gear or everything that is necessary for a weekend family trip. The hull is designed to be with a high initial stability, but at the same time still keeping in mind quick acceleration and end speed. The kayak is equipped in standard with the original Smarttrack rudder system. If You are interested in a simple, beautiful and a reliable tandem kayak, then the Tandem Mini is without a doubt the right choice for You!

LENGTH / WIDTH	540 cm (17'7") / 71 cm (28")
CAPACITY APPROX	300 kg (661 lbs)
COCKPIT	80 x 42 cm (31 1/2" x 16 1/2")
WEIGHT	TGC-lite: 37–39 kg (82–86 lbs) TCA: 35–39 kg (78–86 lbs)
STORAGE	front: oval hatch 44 x 26 cm (17" x 10 1/4") rear: oval hatch 44 x 26 cm (17" x 10 1/4")

SUP

SUP MOANA

Enjoy the sea, the lakes and rivers, a combination between surfing and kayaking.

The Tahe Marine Moana SUP allows a general-purpose program from quiet tours on rivers to exciting surf-action on the seaside. The drop stitch construction allows a much higher air pressure than other inflatable technologies. Thousands of thin threads connect the top and bottom layers of the board.

You will be surprised by the performance of this board, its robustness and manoeuvrability. Of course, when deflated the board consumes very little storage space.

FEATURES AND OPTIONS

All Tahe Marine kayaks are fitted with the most important features a paddler needs for a safe and convenient trip. More and more people like to fit custom options on their kayaks which make the overall performance even better. Therefore we offer a wide range of custom options to make your kayak stand out from the crowd.

RUDDER

Several rudder options available! We use only one of the best rudders on the market.

FOOTCONTROL

Several footcontrol sets available! We use only one of the best footcontrols on the market.

SEAT PAD

Comfortable seat padding tailor made according to Tahe kayaks seats.

SELF-RESCUE STRAPS

Several of our kayaks are supplied with self-rescue straps, which increase safety in reentering the kayak.

SKEG CONTROL

Several skeg control systems available!

HATCH COVERS

Several water tight hatch covers available! We use only one of the best hatch covers on the market!

COMPASS

Custom option. Several compass options available!

REINFORCED KEEL STRIP

Custom option, consists of 25 mm wide yellow or black aramide tape on the hull of the kayak.

LOCK SYSTEM

Several of our kayaks are supplied with the system to safely lock your kayak.

BACKREST

Backrest gives good support during paddling. Several backrest versions available!

THIGH PADS

Soft cell foam pads to be mounted inside cockpit area, in order to improve even more cockpit comfort!

RETRACTABLE SKEG

We use only one of the best retractable skegs on the market.

SEE
THE UNSEEN
IN A
NATURAL WAY

The Trapper legacy started in 1976, when company was established by Fjällraven. Wilderness experiences with environmentally-friendly kayaks and canoes, produced by a company with a respected track record in making the very best in outdoor equipment. Models are named after lakes (Huron, Ontario, Michigan, Erie, Superior) and species that represent the freedom and cunning of the wild – these kayaks and canoes have something arising from the soul and character of each one of them which will help you experience the pristine wilderness in a different way.

All Trapper canoes and kayaks are made with the most eco-friendly materials available. Trapper products use cork as the core material. Cork is a renewable and environmentally-friendly material, absorbing less resin during production process than other core materials, giving lighter weight high-density laminates, which have greater impact performance, slamming resistance and act also as great insulators.

 **Trapper** 

ABOUT TRAPPER

THE ENVIRONMENT

Wood – Tahe Outdoors Ltd as a manufacturer has made sure to cooperate only with reliable partners, who can ensure us and our customers that all the parts supplied from wood are harvested from the forests having all necessary permits according to the official regulations and treated with environmental friendly agents.

Core – Tahe Outdoors Ltd cares about environmental awareness, so we have started using a 98% recyclable HD core in our products since 2010. Cork is a renewable and environmentally-friendly material, absorbing less resin during production process than other core materials on the market, giving lighter weight high-density laminates, which have greater impact performance, slamming resistance and act also as great insulators.

Fabrics – The fibers used in the manufacturing of the fabrics have a low environmental impact during processing. The yarns in the fabrics are easier to impregnate giving better fiber/resin interactions and therefore better performance of the end-product. The latest fabrics have been improved to a level that they can perfectly be used in vacuum injection and resin transfer moulding processes, used by Tahe Outdoors Ltd successfully since 2005.

Resin and gelcoats – Tahe Outdoors Ltd has over the years moved with the gelcoats and resins used in production processes into higher solid & low styrene emission content products. This has been achieved in cooperation with only the best raw material suppliers in world using the highest technologies and R&D available.

Technology – Tahe Outdoors Ltd as a manufacturer cares about the working environment, therefore since 2005 the company has been using vacuum infusion process for manufacturing. In 2009 the manufacturer invested into light-RTM equipments and moulds and started using these as one of the production processes also very successfully. Nowadays both of the production methods, being the most environmental friendly ones in composite technology, are used to build Trapper range products. This means that most of the solvents are handled in a closed system and creating not only better working surroundings, but environment overall. Ofcourse people familiar with these modern technologies also know that these production methods give the possibility to produce lighter weight laminates, meaning less chemicals are used to produce successful products.

Recycling and waste management – Tahe Outdoors Ltd cares about sustainable living, so we have started in cooperation with our reliable partner to target higher efficiency cutting of the materials creating less waste and it's management. This can only be achieved in high investment into the newest possible IT programs and cutting devices using custom made programs and patterns to cut in the best possible way. At the same time we have also invested into cooperation with Universities to use fiber and resin rests in glues to take waste in our company to minimum level possible.

THE DESIGNER

The designer of Trapper kayaks & canoes, Hans Friedel, was born in 1960 and grew up right next to the third biggest lake in Sweden, so he has all that it takes to be passionate about life on the water.

He has been “playing” in the water all his life and for the last twenty years he has also been designing canoes and kayaks. Hans gets his inspiration from paddling across the water himself; he is always curious to see what is on the other side of the lake...

TRAPPER

SEA TOURING KAYAK

COMO

The Trapper Como is designed for a smaller or mid-size paddler.

The kayak has a narrow, more V-shaped hull with smooth bow and stern. Hard chine and a low aft deck will make it maneuver and be easy to roll. Although this kayak is shorter in the length, it will keep up with the longer ones. It is equipped with 3 compartments, two for larger equipment and a minibox for easy access gear. This kayaks comes with rudder/skeg combination.

LENGHT / WIDTH	505 cm (16'7") / 54 cm (21¼")
CAPACITY APPROX	115 kg (253 lbs)
COCKPIT	83 x 45 cm (32¾" x 17¾")
WEIGHT	ECOLITE: 19-21 kg (42-46 lbs) HILITE: 17-19 kg (37-42 lbs)
STORAGE	front: round hatch 24 cm (0'9") rear: oval hatch 44/26 cm (1'5"/0'10") minibox: round hatch 15 cm (6")

TRAPPER

SEA TOURING KAYAK

EYRE

The Trapper Eyre is designed with more rocker and a summetrical hull-shape to make it a more playful kayak.

It was designed by Hans Friedel taking his experiences from the slalom kayaks. Although it is a sea kayak, it feels very easy to control and maneuver. This kayak can be used for surfing and playing in the waves. It is equipped with 3 round hatches and comes with retractable skeg.

LENGTH / WIDTH	505 cm (16'7") / 54 cm (21 ¼")
CAPACITY APPROX	120 kg (264 lbs)
COCKPIT	80 x 42 cm (31 ½" x 16 ½")

SEA TOURING KAYAK

ARAL

The Trapper Aral is a good all-around kayak, suitable for a range of experience and a variety of paddling conditions.

Yet in essence it is first and foremost a wonderful sea touring kayak. The hull is designed with a V – shape, which makes it very easy to turn and manoeuvre with a paddle. The kayak is equipped with two oval hatches for larger compartments and a minibox for easy access of the gear You need. The kayak comes with rudder/skeg combination.

LENGHT / WIDTH	520 cm (17'1") / 54 cm (21¼")
CAPACITY APPROX	130 kg (286 lbs)
COCKPIT	78 x 42 cm (30¾" x 16½")

SEA TOURING KAYAK

MALAWI

The Trapper Malawi is designed to be a very fast and versatile sea kayak, for those who have the hunger for speed.

It has a long and straightened keel line and is design with a V-shaped hull, which makes it rather easy to manœuvre for a kayak this size. The Malawi is designed also keeping longer trips and expeditions in mind, as it has totally four compartments – two larger compartments equipped with oval hatches and a minibox and day-hatch for easy to reach gear. This kayaks comes with rudder/skeg combination.

LENGHT / WIDTH	565 cm (18'6") / 54 cm (21 ¼")
CAPACITY APPROX	160 kg (352 lbs)
COCKPIT	81 x 42 cm (32" x 16 ½")

BELUGA

EGALIS

CONSTANTLY STRIVING FOR QUALITY

Beluga, established 1993 in Canada, started out producing accessories and safety equipment for freshwater canoeing. Inspiration came from Salt Lake Island – the most beautiful island in British Columbia. From the outset, Beluga has been driven by a desire to innovate, to develop new ideas and confront them with existing products and equipment. Today Beluga provides more than a hundred different products for kayaking, surfing, fishing and sailing fans. An unwavering attention to detail and the use of consistently high quality materials are the standards which have established Beluga's stellar reputation. When you handle a Beluga product, you can readily feel and see for yourself the care taken in manufacturing and finishing of every one of our products, whatever its price or complexity. Beluga constantly strives for quality, both in the way of working and in the raw materials used in manufacturing products.

MARKET LEADER

IN EUROPE

TODAY

Founded in France in 1962 the company manufactured and marketed wooden oars and paddles, later adding accessories for camping and boating. In the 80s the company began developing a range of aluminum and plastic paddles, a range that continued to evolve to become the market leader fielding Europe today! 50 years experience gives and opportunity to offer the best products with excellent performance. All paddles are made in France in beautiful Cognac. Egalis offers different technologies in plastic injection. The machinery and production methods are constantly evolving to respond to the needs of the paddlers.

ARCTIC EXPLORERS

TIMO PALO AND AUDUN THOLFSEN

ARCTIC EXPLORERS TIMO PALO AND AUDUN THOLFSEN WERE DROPPED AT THE GEOGRAPHICAL NORTH POLE, WHERE THEY STARTED THEIR EPIC JOURNEY BACK HOME. USING LIFESTYLE KAYAKS AS SLEIGHS.

"We travelled approximately 1600 kilometers during the 72 days. About 400 kilometers of that was paddling."

A person is seen from behind, sitting in a red kayak on a very calm, glassy body of water. The kayak is loaded with gear, including a blue roll of fabric. The person is wearing dark clothing and a hat. The water is perfectly still, creating a clear reflection of the kayak and the person. In the distance, a low, hazy horizon line is visible. The sky is a uniform, pale grey-blue, and a bright sun is positioned in the upper left quadrant, creating a soft glow and a slight lens flare effect. The overall mood is serene and quiet.

“First of all we want to thank all of you who you have been with us in thoughts and words! The messages what were received from you via Iridium phone had a lot of spiritual strength that made us believe more into success, even when there were hard times. We felt us not alone at all!”

DEALERS

ONLINE ORDERING

Take Outdoors Dealer online ordering site allows you to order products 24 hours a day, 7 days a week, with up-to-date product information, including all Take Outdoor brands and products.

- Simple and user friendly navigation
- 3 different languages - English, German and French
- Product catalogues and product specifications
- Build your own product by choosing different features, from must to colour and product code

FOR MORE INFORMATION PLEASE VISIT
WWW.TAHEOUTDOORS.COM

- Download different materials - user manuals, photos, logos, PDF-catalogues etc.
- Upsell and cross-sell possibilities for additional buying customers. We always care about feedback of our testers. We always care about our customers, as reputation and trust are the most important keywords in watersport industry. Our mission is to change your lifestyle and we do utmost everything to reach this goal!
